

This is a **list of perennial and grasses**, which we are currently producing on the nursery. **These will be available for sale about Easter and we will make prices available sometime around mid February.** For various reasons, frost, slugs, etc. Not all young plants will make it through the winter and we will be making alterations and additions to the availability list as we go through the winter.

**We produce many of these plants from cuttings, and many more are grown from seed by an excellent young Irish nursery (Nightpark Nurseries).** New and better varieties are being bred all the time and we source these from Holland and the U.K. We try to pick a good selection of what we know to be the better plants and make them available at a reasonable price.
